SUMMARY

With a background in full-stack web development and event and customer service management, I thrive in changing environments and have an unquenchable curiosity that leads me to constantly seek new skills. For me, there is no greater joy than coming up with creative solutions to problems by looking at them from all angles, whether that's in web development, in designing an efficient path of travel for simultaneous events, or coming up with creative alternatives when I've just run out of eggs and I'm halfway through making a new cookie recipe!

SKILLS

Javascript, HTML, CSS, React, Python, Django, PostgreSQL, MongoDB, Express, SPSS, event coordination

PROJECTS

-**Flashcards**: an app designed to be used as a study tool for GRE vocabulary words. Built with vanilla JavaScript, HTML, and CSS. https://git.generalassemb.ly/julianadepp/flashcards
-**Cocktail Menu Generator**: an app that generates a cocktail menu and allows users to select some custom elements. Cocktail information is pulled from an API. Built using React.
-**Crochet Tracker**: a full stack app where users can track the essential aspects of their crochet projects, saving information to a PostgreSQL database. The API is built using python and Django, with a React.js frontend.

CAREER BACKGROUND

SOFTWARE ENGINEER FELLOW

General Assembly | 2021-present

- Designed and built responsive front end web applications using both vanilla javascript and react
- Gained 500+ hours of practical, hands-on experience with web development

MANAGER

Village East by Angelika, Reading Int. | 2014-2020

- Led a strong team of 25 employees to meet desired customer service and budget goals in a 1,180 seat building with 7 theaters
- Maximized cost efficiency by maintaining labor and expense targets
- Managed individual events from start to finish, including film festivals, private premieres, and in house special programming
- Developed handbook for training successful employees in good customer service, operations, and sanitary practices
- Liaised effectively between my team and other departments

EDUCATION & TRAINING

GENERAL ASSEMBLY
Software Engineering Immersive

HUNTER COLLEGE CUNY
Bachelor of Arts, Major in Psychology
Concentrated study in Africana & Puerto Rican/Latinx Studies
